PROFILE

Full stack developer who builds and runs the operational systems of a multi-brand D2C beauty company. I design ERPs, integrate Shopee and TikTok Shop APIs, automate ad reporting, ship conversion-focused landing pages and keep the production server secure. I care about numbers that match their source exactly: every report is reconciled against the marketplace or ad platform until the difference is zero.

EXPERIENCE

Full Stack Developer — Montera Group (Skinlyfe & Prepare)

Jul 2026 – Present · Full-time

- Built and maintain the company **ERP** (CodeIgniter, MySQL): real-time sync of Shopee & TikTok Shop orders, waybills, payouts and stock, validated order-by-order against the marketplace APIs.
- Built live **sales dashboards** that match Seller Center figures exactly, and **net-profit reporting** combining COGS, platform fees, payouts and ad spend.
- Automated **daily ad reporting** for 30+ Meta (CPAS) ad accounts with the Graph API and Google Apps Script: two-way sync with the team's Sheets, 3-day re-sync, automatic monthly rollover; added TikTok Ads validation.
- Shipped **HR & attendance**: face-verified clock-in, office-WiFi presence check, attendance map, leave and schedule rules.
- Built a **warehouse module**: barcode scan stations, 100×150 shipping labels, waybill tracking and problem-parcel alerts.
- Launched product **landing pages** and a branded link-in-bio on dedicated subdomains with SSL and Meta Pixel events, plus a one-command template for new products.
- Building an **affiliate WhatsApp inbox** (Node.js, Baileys) that brings six team numbers into one web interface (beta).
- Run the **production VPS**: Apache, firewall & fail2ban, security patching, and encrypted daily off-site backups.

PHP · CodeIgniter · MySQL · Node.js · Google Apps Script · Meta Graph API · Shopee & TikTok Shop APIs · Ubuntu

IT Trainer (Volunteer) — 4 schools in Jakarta & Tangerang

Jan 2025 – Apr 2025

- **El-Rasyad Jakarta** (Jan 2025, 50+ students): responsive portfolio websites from HTML/CSS to interactive JavaScript.
- **Qurrota A'yun Jakarta Timur** (Jan 2025, 30+ students): card-based UI, responsive grids and typography.
- **SMK Islam Insan Mulia, Al Anwar Bina Mulia** (Jan 2025, 33+ students): vocational web development aligned with industry practice.
- **SMK Hiro Tangerang** (Apr 2025, 50+ students): project-based bootcamp building and deploying web apps from scratch.

163+ students trained · 3-day intensive programs

SKILLS

Backend	PHP, Laravel, CodeIgniter, Node.js, REST APIs, webhooks
Frontend	HTML5, CSS3, JavaScript, React, Next.js, Tailwind CSS, Bootstrap
Mobile	Flutter (Dart), Firebase
Data & Automation	MySQL, PostgreSQL, Google Apps Script, Google Sheets, n8n, OpenAI API
Integrations	Shopee Open Platform, TikTok Shop, Meta Graph / Marketing API, Meta Pixel, WhatsApp (Baileys)
Infra & Tools	Ubuntu Server (VPS), Apache, SSL (Certbot), UFW, fail2ban, Git/GitHub, Figma, VS Code

SELECTED PROJECTS

Montera ERP — Montera Group
Orders, waybills, payouts, stock, profit, HR and warehouse for two brands; zero-discrepancy reconciliation with marketplace APIs.

Landing Pages & Link-in-Bio — prepareofficial.com
Fast, mobile-first product pages with Meta Pixel events and a reusable deploy template.

Attendance App — personal
QR-based attendance with admin dashboard (Flutter, Firebase).

Ads Reporting Automation — Montera Group
30+ Meta ad accounts pulled daily into Sheets and a dashboard; monthly files roll over automatically.

EventEase — personal
Event management platform with QR tickets and participant management (Laravel, Tailwind).

E-Commerce & News Apps — personal
Flutter e-commerce app with Firebase auth and cart; news aggregator with SQLite bookmarks.

TRAINING & BOOTCAMP

IDCamp Dicoding x Indosat Ooredoo Hutchison — Front-End Developer — Jan 2025
Modern JavaScript (ES6+, promises, modules), CSS Grid, Web Components, NPM, Fetch API & REST.

IDCamp 2024 — Front-End Web Expert, Dicoding Indonesia — Mar 2024
Accessibility, animations & transitions, media features, real-time maps, PWA and deployment.

EDUCATION

IDN Boarding School, Sentul
Junior Software Developer program · 2024 – 2027

Languages
Indonesian (Native) · English (Intermediate)

CERTIFICATIONS

HackerRank — REST API (Intermediate)
Dicoding — Front-End Web Development Fundamentals
Dicoding — Cloud Basics and Gen AI on AWS
DataFlair — Introduction to Flutter
